Due to the outbreak of DOWNY MILDEW there will not be any impatiens or double impatiens sold. This fungus only affects impatiens and double impatiens. **Sun impatiens***, **New Guinea impatiens***, **flowering vinca*** and other plants are **NOT AFFECTED** by this fungus.

ALTERNATIVES TO IMPATIENS:

*"Sun impatiens" thrive in **full sun or part shade**. They are unaffected by downy mildew and are more vigorous than New Guinea impatiens. This was a big seller last year.

*"New Guinea impatiens" thrive in **sun or part shade**. They flower until the first frost and require good watering.

*"Flowering Vinca" flowers from late May until frost. It thrives under **sunny, hot, dry conditions**. The flower looks like impatiens flower. This was a big seller last year.

*"Begonias" flower spring thru fall in **part shade to full shade**. Great for borders.

*"Bounce Impatiens" Does well in the shade. Bounces back quickly if it starts to wilt when in need of watering.
